Dynamic media
for E-mobility,
prices, car wash
and kiosk sales.

Full control and maximum exposure

High visibility signage

With ViewNet ViewCharge digital price and IoT Signage display, you can combine traditional price, E-Mobility Charging status, Shop announcement of Carwash countdown info to a large screen solution. Flexible and future-proof digital solution.

ViewNet IoT and API Cloud based CMS system communicates with your database the prices and other external API interface to display all the content and information you like..

The screens can let new prices come onto the screen with animations, increasing the level of engagement further.

New fuel products or credit cards providers? these can be easily switched – without cost or physical intervention on the pylon.

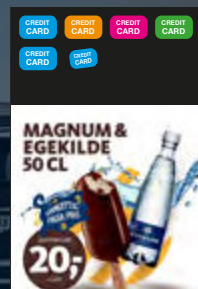

With a suitable motion graphics spot, a kiosk screen quickly attracts the hungry customer on the go, and provides the store with add-on sales.

We have the Market's most user-friendly IoT and API Cloud based CMS system with monitoring and media library. Easy management and execution of marketing campaigns.

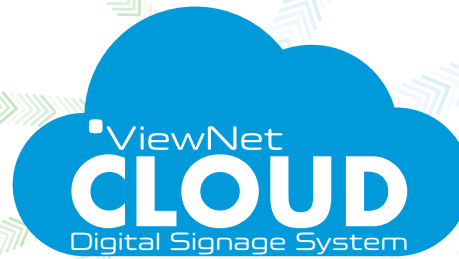

Be visible to your customers at long range, with a ViewNet 360 LED-Cube Top Box. Used in combination with our Digital signage solutions. The top box is white acrylic and has a lot powerful interior LED light. Initiating long range interaction. The top box can be your company color.

Our Pylons stand out, with high definition resolutions, at low prices. Reliable, low power consumption machines using our power saving LED screens. Long warranty and lifetime after-sales service warranty with nationwide service setup.

We provide total service solutions. Construction, lifetime service, and optionally content operations and/or graphic media services.

VN Power2X

- Visibility in traffic

New, combined info Pylon and charging stations that ensure exposure and visibility in traffic

The LED screen is fully graphic and can be freely arranged to display electricity prices to motorists on the road, as well as how many charging stations are available.

The lower part of the screen shows clear spots for those parked at the site, and for the passing motorists.

The combined info and charging stand, reduces the equipment on site and gives a simpler and more manageable look. An LED top-box ensures clear branding and visibility at a distance.

ViewNet leading the way:

Customized Solution

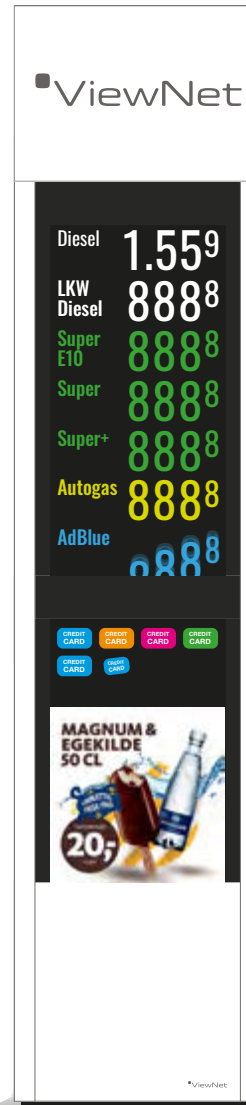

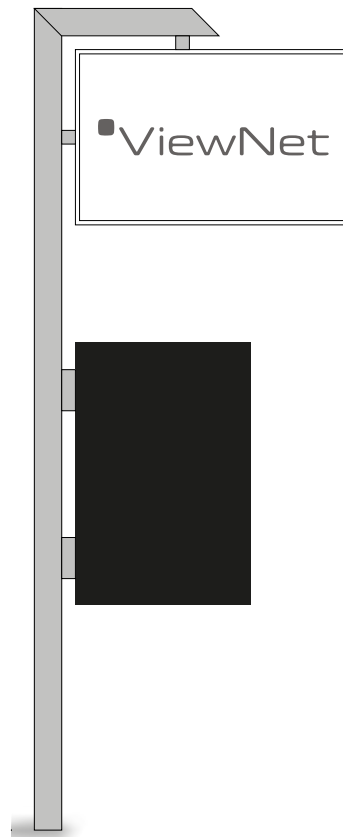

Danish minimalist design, simple, uncomplicated and well thought out

The slimmest pylon on the market with a high degree of attraction and good visibility from great distances.

Tailored and easy to adjust for optimal function. Can also be used in existing pylons.

Easy expansion to multiple screens when the need arises, and centralized control of graphical content. Easy access during installation and service.

All products are designed, assembled and tested in Denmark.

Super Black Panels

Higher contrast, lower power consumption and longer service life. ViewNet Super Black LED panels ensure the highest picture quality on the market in sunlight.

High quality Power supplies without Fan

High quality LED chip with gold wires, fewer dead pixels and longer lifespan

ViewNet Energy Saving - Particularly energy-saving

4-layer circuit board for optimal distribution of voltage and heat dissipation as well as EMC protection

The logo for ViewSolar, featuring a small white square icon to the left of the text "ViewSolar" in a white, sans-serif font, all enclosed within a white rectangular border.

ViewSolar

A tall, dark blue, rectangular structure with a grid of horizontal lines, representing a solar-powered information pylon. It is positioned on the right side of the image, partially overlapping the green field and blue sky.
